Subject: Tax Hike - Public Hearing Testimony

Dear Senator Fasano and Representative Klarides:

Please think twice about raising our taxes. They are already a huge burden to the citizens of our wonderful state. It is not unrealistic for tax payers to expect our elected officials to work within our/their means. In fact, I would call it totally irresponsible to burden our children with future debt by mortgaging our futures to balance the budget. I respectfully ask you to please reconsider any new taxes OR "LOANS"(which I feel are even worse than new taxes)to balance the state budget this or any year. In closing, I would like to make a suggestion "We could change our state motto to "Connecicut-The state that lives within it's means":)
