Subject: Tax Hike - Public Hearing Testimony

Dear Senator Fasano and Representative Klarides:

Currently I am in the start up phase of my small business. I have established an eco-friendly landscaping benefit corporation to fulfill a mission my current city and state lacks. More tax revenue. Taxes will be generated through the company and the employees. Instead of taxes the bottom line majority such as small businesses without any leverage to actually sustain ourselves increase the tax on the minority high income earners. Change our state legal language to allow other alternatives to circulate revenue among small businesses. Small businesses if allowed to grow without fear from tax hikes can hire more tax paying workers. Also with our tax dollars currently in circulation embrace cooperative economics.
