Subject: Tax Hike - Public Hearing Testimony

Dear Senator Fasano and Representative Klarides:

Regarding the tax situation in the State of Connecticut, the legislature's addiction to the people's money requires intervention. Because "leaders" believe that they can always go back to the well and separate US from OUR money, there is no incentive for publically funded activities, ranging from food stamps to pension benefits to management of agencies such as the DEEP, to be efficient, thoughtful, or particularly well considered. Additionally, politicians such as Martin Looney and the Governor support "behind closed door" 11th hour actions that preclude transparency and purposefully eliminate the opportunity for meaningful dialog and public comment which borders on illegal pursuant to the State Constitution. YOU MUST STOP DRIVING THIS STATE INTO RUIN.
