

The proposed state budget by the Democratic Assembly includes increased spending levels and increased taxes. We can not afford another major tax increase on top of the highest tax increase in history that was put in place by Malloy.

We already have one of the highest tax rates in the country. We rank at the bottom of the barrel for states to do business.

The population in Ct is declining due to people and companies leaving the state. The proposed budget will only make a bad situation worse.

Sincerely,  
Mike Carbray
