**Subject:** Please Do Not Circumvent the Spending Cap!

Tara and all our legislators,

The spending cap is in place for just this purpose. To keep our state government living within our means. Connecticut is continually the first to enter a recession and the last to leave. We have gone from a manufacturing power house to an anemic economy based on finance, insurance and services. This direction is NOT sustainable and we need to lower taxes and decrease government spending to encourage overall growth in the state.

Please work together towards a budget that will encourage and sustain private sector growth!

Thank you,

Randy Danenberg
