Subject: Natural Gas availability in local communities

Hi,

I am and have been looking to determine how I can take advantage of the natural gas that has become so prevalent in the rest of the country. It saddens me that CT is burdened with expensive forms of energy when I feel it is unnecessary.

Please let me know how I can access natural gas. Based on the CT energy strategy, I should be able to get connected to NG, but I have made 4 requests to Yankee Gas with not one response. I am certain my neighbors would be willing to connect as well. Please answer. Thank you

Sincerely,

Tim Curran
