

It's Time to Speak Out

May 7, 2015

It's alarming that our legislature continues the same tax and spend trend that got us into this situation in the first place. We need responsible fiscal policies not more of the same. We don't have a revenue problem we have a spending problem. I run my own business and could not function spending more than I take in. As a matter of fact the legislature is pushing my business to the edge due to increased costs and taxes in CT. If it were possible today I would join the mass exodus of people leaving this state. The high taxes and high cost of living are taking a toll on all hard working citizens and business owners in this state. I'm disgusted by the current fiscal policies and let it be known I have not voted for many of those now in office and I hold the uninformed voters of this state and the opportunistic legislators responsible. I used to feel CT was my home but I've lost affinity for this state and am looking forward to spending what little money I have left elsewhere.
